SP = Shell Pennant

CP = Clinker Pennant

* Clinker boat

49 crews are believed to have started; 45 finished. No official start order is available; the order has been worked out on the basis of old and new shell entries, followed by old and new clinker entries. It is assumed that Westminster Bank I did not start, likewise University of London, but the other two crews are unknown and are therefore not allowed for in the start numbers.
